

V: 2.0

Date: 25/08/11

Mode 'Stats Only' MailWatcher / Domino

Objectifs

Implémentation d'une sonde rapide, auto-suffisante, compatible avec d'autres systèmes tels que les anti-virus natif Domino en mesure de collecter des informations sur les messages transitant sur un serveur Domino.

Livrables

• nadvsrv.dll - 4.0.27 – Win32

Configuration notes.ini

- EXTMGR ADDINS=advsrv
- MWADVSRVSTATSONLY=1

Option : Spécification d'un chemin

MWADVSRVSTATSFILEPATH=C:\Lotus801\Domino\data\mwstats\

NB: Attention à bien ajouter le dernier séparateur.

Si cette variable ne figure pas dans le notes.ini, le code crée un sous-répertoire à la racine {DATA} du serveur

• /mwatcher/dumpstats/

Construction du nom de fichier de collecte

Le fichier est composé du nom complet du serveur Domino – nom le cas échéant modifié pour être conforme vis à vis des systèmes de fichiers (=,/,\ sont remplacés par '_') et d'une fonction du temps. Le système crée au plus un fichier par heure.

Exemple de fichier:

- Serveur = CN=DOM801WIN32/O=MWATCHER
- Période = 15 Septembre 2008 entre 13h00.00 et 13h59.59
- fichier = CN_DOM801WIN32_O_MWATCHER\$20080915_13

Modification par rapport à V1 : séparateur \$ entre le nom du serveur de collecte et la date

Structure des données dans le fichier

file structure.

* : field sep '|', multi value sep '\mu'

* : sProcessed [YYMMDDHHMMSSCC]
* : sFrom - char - MAXUSERNAME (256)

* : NbRec - int -

* : sSendTo - char - 30 * MAXUSERNAME * : sCopyto - char - 30 * MAXUSERNAME * : sBlindCopyTo - char - 30 * MAXUSERNAMe

* : nGlobalSize - float .2 -

* : nbAttach - int - number of attachment

* : sAttachExtension - char - 1024 - list of extension - separated by '\u03c4'

* : sAttachSize - char - 1024 - list of attachment size in KB - 0.2f - separated by '\u03c4'

Modification par rapport à la V1 : sRecipients est remplacé par sSendTo, sCopyTo, sBlindCopyTo

char* { sFrom, sSendTo, Scopyto, sBlindCopyTo } are converted from Notes to NATIVE.

Exemples

Fichier de collecte
